## Time clock

### *The Software Veloce, Your manager*

The Veloce Time Clock is the perfect tool to help you save on labour, both in the kitchen and dining room. This module gives you the tools you need to better manage work schedules, overtime, tardiness, days off and employee availability. The integrated validation tool for hours worked ensures optimum labour cost management, which is not something your old mechanical time clock could do. In addition, you save on management time and cost: no need to extend time cards and, with several accounting systems, the data transfer takes place automatically to the pay module, including full tip management. All you have to do is sign the checks or take care of direct deposits.

Thanks to the Veloce Time Clock, you will have complete knowledge of the start and finish times of all your employees, you will save payroll management time and you will have more time for your precious customers.

The Veloce Time Clock module is easy to use, and it is the one that gives you the best return on investment and the shortest payback time. As you know, effective human resource management is key in the foodservice and hospitality business, where labour exceeds 30 % of total costs.

For more information about this module, contact us and it will be our pleasure to help you maximize your company's profitability while offering you what you need most as manager: TIME.
